## Architecture
Diagramme de classe

Code source

Core API :

Radar Service :

```
radar-service
  .mvn
  radar-command-service
    .mvn
    src
      main
        java
          com.infractions
            aggregates
            controllers
            RadarCommandServic
      resources
  target
  .gitignore
  mvnw
  mvnw.cmd
  pom.xml
  radar-query-service
    .mvn
    src
      main
        java
          com.infractions
            controllers
            entities
            mappers
            repositories
            services
            RadarQueryServiceAp
      resources
```
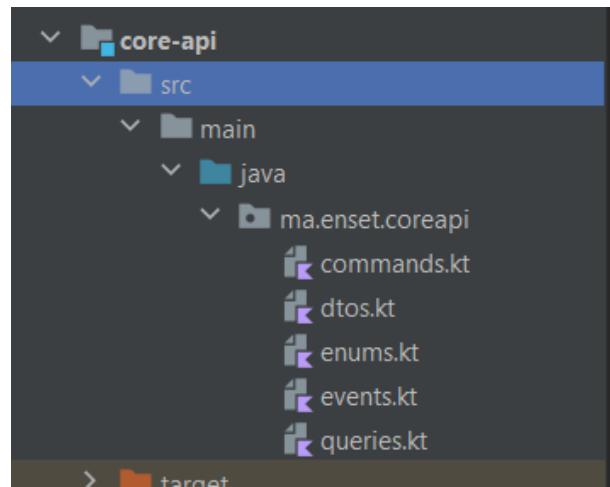

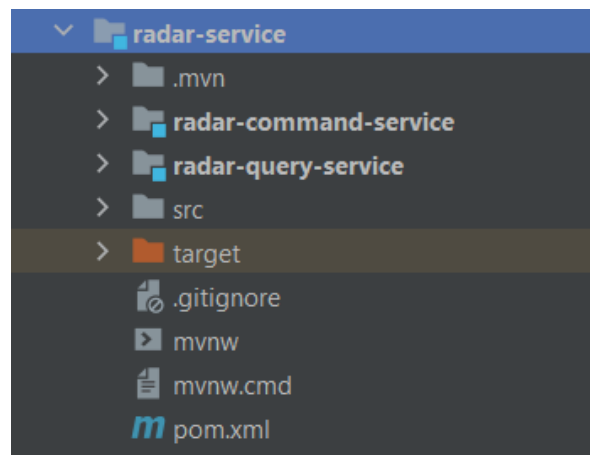

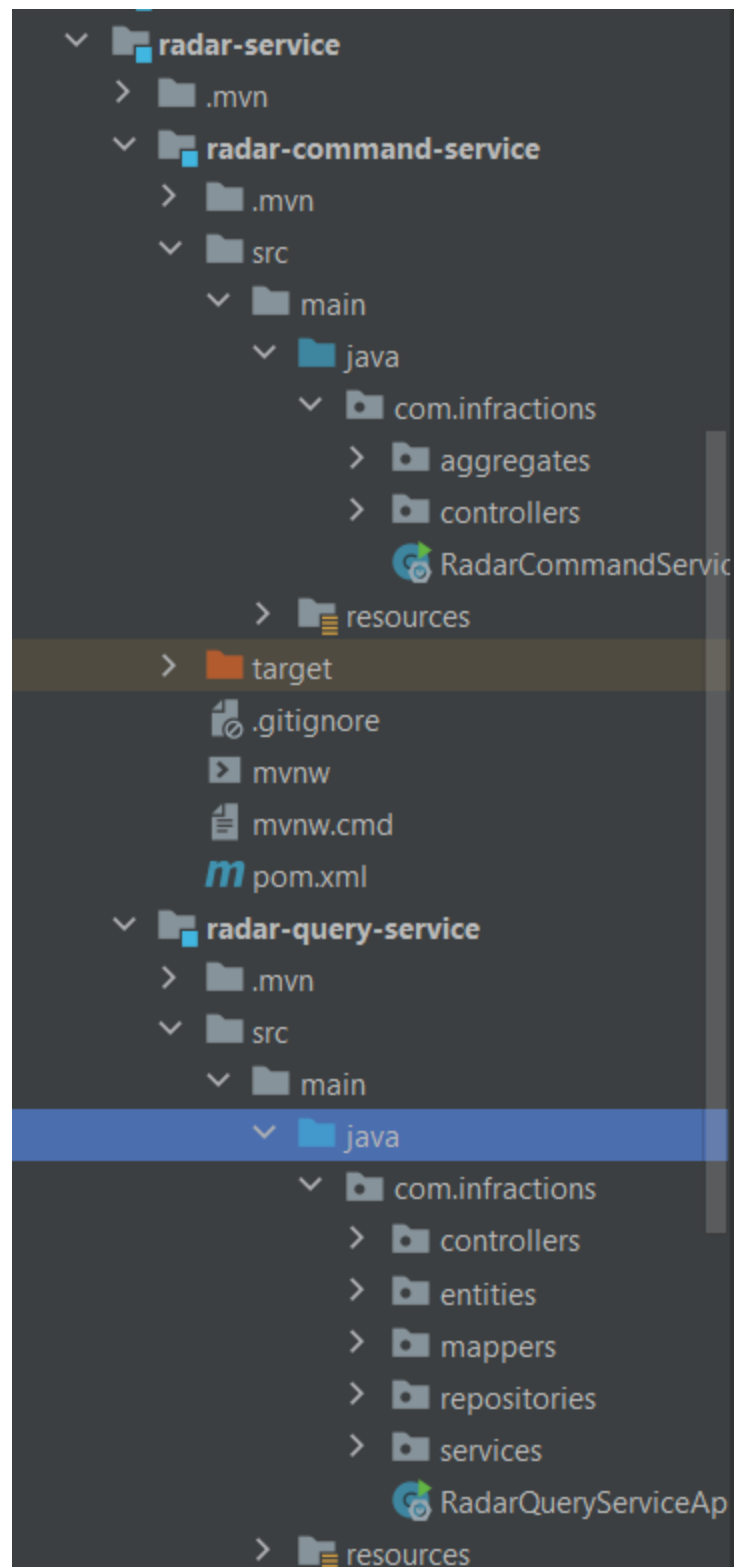

Immatriculation :
